

JOHN M CORR, JR.

Troop 50

Project Hours 193.00

Board of Review 05/26/16

EAGLE PROJECT I led the design, fundraising and construction of a new manger structure to replace the worn and heavy structure from the old nativity scene for the St. Isaac Jogues Parish of Valley Forge. The new structure was designed to be lightweight, efficient to set-up and take down, and easily stored. With the help of fellow scouts and adults under my leadership, the structure was built and set up on church grounds, and will continue to be set up for display every Christmas season.

SCOUTING ACHIEVEMENTS PL, Den Chief, Troop Guide; OA Brotherhood; Northern Tier; Den Chief Award, Standard Patrol Award 2011 and 2012, World Conservation Award

FUTURE AMBITIONS I plan to attend Virginia Tech in the fall of 2016, with hopes to study mechanical engineering and business towards both bachelor's and master's degrees. After college, I hope to work for one of the top engineering firms in the country, designing newer and more efficient engine products. I also hope to start a successful family, and work to spread the morals and ethics Scouting has taught me to others in my life.

Eagle Project
