

# JOHN M DUTTENHOFER II

Troop 31

Project Hours 346.00

Board of Review 08/23/16

**EAGLE PROJECT** My project was a sustainability / educational project centered around the school's outdoor garden. I built a Rotating Composter from a 55 gallon barrel and a frame to support it. Students will learn the importance of sustainability by depositing compostable material from PES's cafeteria. The compost will be mixed with the soil in the school's raised garden beds. Crops from the garden will be used in the cafeteria, completing the cycle. I built 10 Trail Signs for the trail around the school. The teachers will use the signs with their curriculum (outdoor story book, exercise stations, etc.).

**SCOUTING ACHIEVEMENTS** Den Chief, APL, PL, ASPL, SPL; OA Brotherhood; Wilderness First Aid; Philmont (Crew Leader); Good Citizenship Award from Mayor Comitta

**FUTURE AMBITIONS** I will graduate from Unionville HS in 2017 and plan to attend a 4-year college for engineering, science, or business, but like mechanical engineering the most. I may continue my education beyond college.

## Eagle Project
