

JOHN-PAUL KALILEC

Troop 50

Project Hours 136.00

Board of Review 02/03/16

EAGLE PROJECT I lead a team of youth and adults to complete my project for Baker Industries, a nonprofit in Malvern. Baker provides employment opportunities for adults who are not able to work in a conventional workplace due to a mental disability, physical disability, a substance abuse issue, a recent release from prison or other challenging circumstances. I constructed a better outdoor eating area by building 6 benches and clearing a trail that workers regularly use to commute from Baker to the Malvern train station. The benches were needed because workers were sitting on dilapidated furniture when outside; the trail was overgrown with vegetation and a large amount of trash on the trail made it unsafe to walk along.

SCOUTING ACHIEVEMENTS PL, Troop Guide (2x), Bugler; OA Ordeal; Scout Leadership Training; Philmont High Adventure

FUTURE AMBITIONS I plan to attend Clarkson University and earn a mechanical engineering degree. I intend to start a career based on my interests in aircraft and mechanical things. I intend to stick very closely with my Catholic and Boy Scout values.

Eagle Project
