

DAVID M FINKELSTON

Troop 78

Project Hours 186.50

Board of Review 01/07/16

EAGLE PROJECT I cleared an area of about 4000 sq. ft. of underbrush, filled with vines, fallen trees and trash, behind my church's rectory. The area was all overgrown. After clearing the underbrush we cut about nine trees down and stacked wood for an existing fire pit. We came through with a stump grinder and roto-tiller to ready the area for planting. To ensure there was no erosion, I planted grass, privacy trees and plants. This enlarged the gathering and fire pit area used by the youth group. This can now also be used by the school and other members of the parish. There are offices in the building and when they looked outside they saw nothing but weeds and ugly vines; now the area is sunny and open.

SCOUTING ACHIEVEMENTS ASPL

FUTURE AMBITIONS I want to go to a 4-year college and study architectural engineering. I would like to be an architectural engineer after graduating.
