

MATTHEW A BORASKE

Troop 220

Project Hours 448.50

Board of Review 06/14/16

EAGLE PROJECT The project consisted of taking an old dilapidated corn crib that was not in use and turning it into a dog shelter that could be exclusively used to house and train shy dogs. This is important since shy dogs cannot be trained or housed well in the presence of more aggressive dogs due to their nature. The project benefited the Mail Line Animal Rescue (MLAR) located in Phoenixville.

SCOUTING ACHIEVEMENTS ASPL, PL; OA Brotherhood; Philmont, NOAC 2015

FUTURE AMBITIONS My immediate plans are graduating high school by earning my IB diploma from the Downingtown STEM Academy. After this, I hope to attend a 4-year college along with two years of graduate school in hopes of attaining a degree in economics. I hope to find a job in either the economics field or in the business side of sport management. One personal goal I have is to travel and visit all seven continents.

Eagle Project
