

JOHN R LYSLE

Troop 191

Project Hours 204.00

Board of Review 01/26/16

EAGLE PROJECT My project was building flowerbeds around a generator at my church, and planting ornamental grasses in those beds. It will improve the appearance of the grounds at my church by masking the generator from view with said grasses. People have been talking about doing something to hide the generator for a while, and this provided a good opportunity for it to finally happen.

SCOUTING ACHIEVEMENTS APL, Troop Guide, Den Chief, OA Rep; OA; NYLT; World Conservation Award

FUTURE AMBITIONS After graduating, I plan on attending community college for 2 years at Delaware County Community College. DCCC offers a transfer program where you go for 2 years, and then you can transfer with your credits to a 4-year college. I plan on taking my academics at DCCC and then transferring to West Chester and taking 2 years of courses in computers. My majoring in computer science and minoring in a programming language or an IT course, I can choose where I want to head. As an adult I want to work with computers, and there are more than enough open jobs in that field.
