

THOMAS J FOGARTY

Troop 50

Project Hours 168.00

Board of Review 01/14/16

EAGLE PROJECT Lead a crew to clear an overgrown floodplain for Jenkins Arboretum and replaced the invasive species with plants native to the mid-Atlantic region that would sustain growth with little to no maintenance. The arboretum will benefit in the future because the placement of the plants will lead to a decrease in erosion as well as preserve the stream bank from being undercut.

SCOUTING ACHIEVEMENTS ASPL (QM, Programs, and Patrols), Troop Guide, PL, APL, Devon 50 YLT Instructor, Summer Camp SPL (2x); OA Ordeal; Sea Base (Crew Leader); NYLT; World Conservation Award, Kayaking BSA

FUTURE AMBITIONS I plan to attend college with a major in computer science and a minor in computer engineering. After graduating, I plan on getting either a master's degree to further my education, or to find a job in the computer science field. I want to pursue computer science because not only am I interested in the field, but I believe computers can be used to help people, and I want to be able to write programs for computers that make them easier and safer to use.

Eagle Project
