

# Anthony Azzi

Troop 21

Project Hours 68

Board of Review 11/29/2017

**Eagle Project** I planned and built a message board kiosk for the South Central Pennsylvania Climbers Association. They needed to update the one they had built on the site at Governor Stable Climbing and Bouldering Area and I got in contact with Ryan Shipp, the ambassador of that area for the SCPC. I am a member of the SCPC and loved the idea of doing a project that would benefit climbing and the great community we are all part of. The kiosk is based off another in a different climbing area they maintain. We adapted these plans to make the kiosk that we built for the SCPC

**Scouting Achievements** Scribe, APL, QM, Troop Guide, NYLT staff; NYLT; Florida Sea Base

**Future Ambitions:** I plan on attending college for management or entrepreneurship next fall. I would really like to work in the outdoor industry. I am working in a climbing gym and love the work. If I could be involved with that community in my pursuits I would be living a fulfilling life. Some of my personal goals besides my education are to open a successful business. I think the outdoor recreation industry is one of the most fascinating and booming industries out there and I want to be a part of it. I have a lot of traveling I want to do, cannot wait to get started and see where I end up going. One of my biggest personal goals is to recover from a rock climbing injury that I have had for the past year and climb El Cap and 5.12.

## Eagle Project
